

Transporting hazardous goods safely since 1999

For 20 years, we have been using customized end-to-end solutions to transport almost 10 million tonnes of cargo annually for our customers.

When ChemOil Logistics AG was founded in 1999, this milestone event for SBB Cargo caused an international stir. In 2004, SBB Cargo ran its first open access trains abroad through ChemOil. A further milestone was achieved in 2006 with the introduction of wagonload services outside Switzerland. The highlight of the company's career to date occurred in 2011 with the launch of ChemLink, the first alternative European wagonload network between Germany and Italy. The new central hub in Offenbach lays the foundation for further expansion of our offering for future needs, in keeping with our philosophy of providing «rail logistics with a finger on the pulse of the times».

ChemOil Logistics AG.

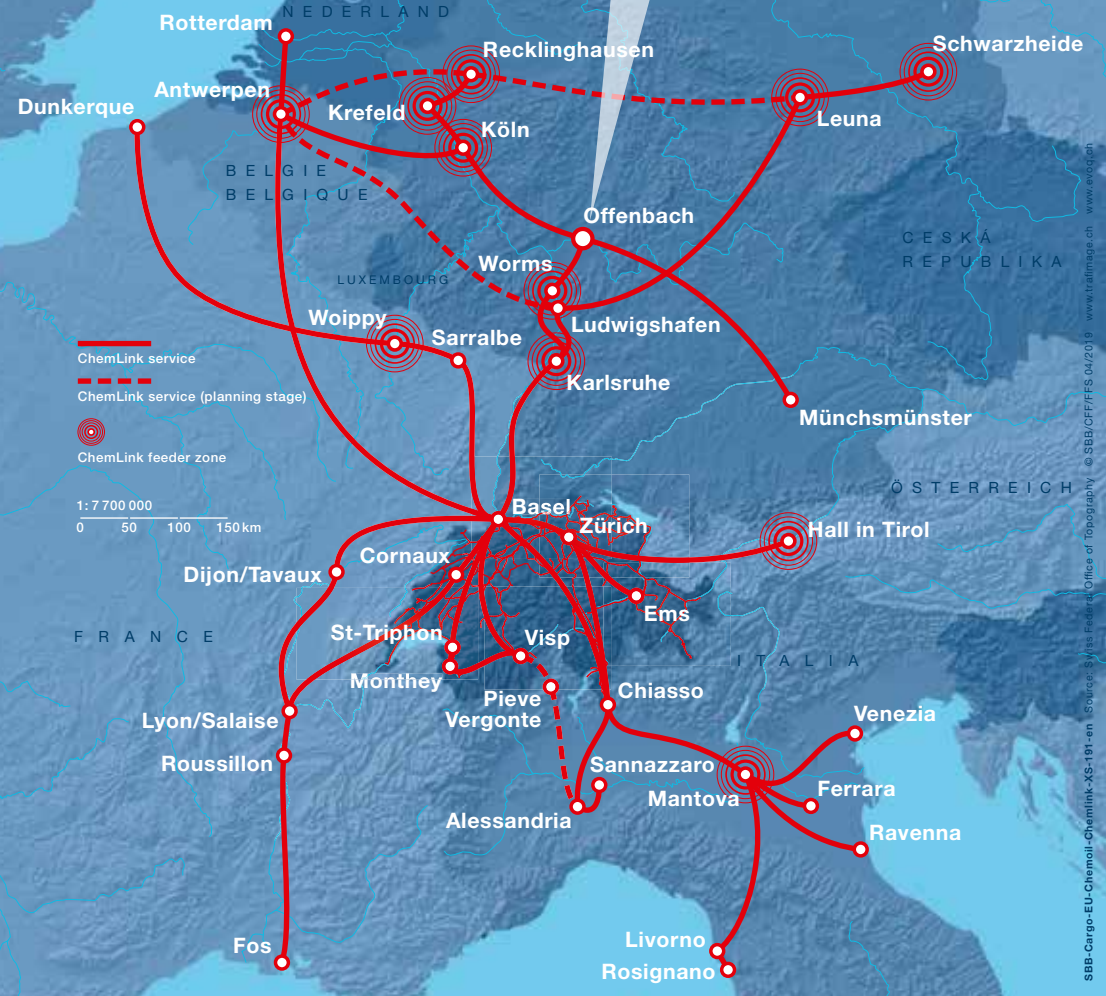

Safety on the right track.

ChemOil

ChemLink.
For reliable wagon group services.

ChemLink is our international scheduled-service offering for wagon loads, providing regular trains between European centres of economic activity in Belgium, through Germany and Switzerland, and onwards into Switzerland in a way that gives you planning security. We have carefully selected partners to handle the last mile and ensure that wagon groups are collected and delivered punctually at customers' premises.

Thanks to the **addition of the new central hub in Offenbach**, you benefit from additional capacities, enhanced services in all directions and new options for partners.

ChemOil Logistics AG.

ChemOil Logistics AG is your partner for pan-European rail freight forwarding and logistics. The SBB Cargo subsidiary was set up to meet the particularly stringent requirements of international rail logistics – primarily for the transport of hazardous goods, but also other types of goods.

As Switzerland's largest provider of customized end-to-end solutions for rail transport of hazardous goods, we transport about 10 million tonnes of cargo per year. Our extensive experience has given us an outstanding knowledge of our field and enabled us to develop highly reliable and efficient logistics systems. We are proud to count virtually all major companies in the industry, as well as many medium-sized and small companies, among our customers. The trust of our customers is our greatest motivation to provide them with tailored solutions both today and in the future.

Products and value propositions.

Our basic products are:

- ChemLink:** for reliable wagon group services
- Block trains:** for large volumes – efficiently transported across Europe

Both can be combined with:

- Fleet management:** for individual vehicle services

In addition to transporting your cargo, we can also supply you with rail wagons, leased either by us or by you. We are also happy to advise you on selecting the right type of wagon for your needs, and provide a comprehensive range of services, including the management of damaged wagons, fleet optimisation and maintenance management.

- Expansion of our logistics portfolio:** for transport solutions in other sectors

In partnership with SBB Cargo, we are increasingly extending our tailored rail logistics solutions to other sectors. Do you deal with international cargo flows we can optimise for you? Working with the experts at SBB Cargo, we can design grain, raw material or construction material transport systems to meet your individual requirements.

Anniversary competition
Celebrate with us, and you could win one of our fantastic prizes!

Top prize:
A weekend for two in Ticino, including an exclusive guided tour of the new Ceneri Base Tunnel.

Other prizes:
A cab ride of your choice, an anniversary voucher for two people for Circus Knie and two first-class one-day travelpasses for the whole of Switzerland.
